About

Brand Design Leader and Design engineer specializing in scalable design systems, owning the full pipeline from Figma to production code. I build the systems that let brand and engineering ship from the same source of truth.

Education

Graphic Design Bachelor of Fine Arts

AUG 2011- DEC 2015

Auburn University
Minor in Spanish

Skills

Creative Cloud
Figma
Asana
Visual Studio
Github
HTML/CSS/Javascript
Typescript
Tailwind
React
Vercel
NextJS
Codex/Claude Code
n8n

Experience

Senior Brand Designer

FLEETIO | REMOTE | MAY 2021-PRESENT

- Built Fleetio's web design system end-to-end in Figma and connected it directly to production via GitHub, creating a 1:1 design-to-code pipeline that lets engineers ship UI straight from the source of truth I build and maintain.
- Build and maintain Fleetio's component library, design tokens, and motion patterns across web — reusable components I designed and shipped cut design workload by 30% without sacrificing craft.
- Art directed the Fleet Manager's Manual, a long-form content experience that generated 1,000+ MQLs over three years, demonstrating how brand craft drives measurable pipeline.

Marketing Director

MOVE & STORE | BIRMINGHAM, AL | AUG 2018- MAY 2021

- Owned branding and marketing strategy across multiple acquired companies simultaneously, including Admiral Movers and New Latitude Movers, managing distinct brand identities under one parent strategy without losing consistency or speed.
- Rebranded and up-leveled 3 acquired companies, each requiring a tailored approach to preserve existing customer trust while aligning to a more scalable, professional brand standard.
- Built repeatable systems, including email workflows for every stage of the buying journey and scalable ad campaign frameworks, so each brand could run independently while still drawing from a shared playbook.

Graphic Designer

PLATYPI | BIRMINGHAM, AL | FEB 2016- MAR 2017

- Designed brand identities, websites, and app interfaces for clients across a wide range of industries, balancing multiple concurrent projects in a fast-paced agency environment.
- Served as the primary client contact from initial discovery through final delivery, translating business goals and feedback into design direction while keeping projects on time and on brand.
